

Revolutionary, State-of-the-Art:

## Burkert FLOWave SAW (Surface Acoustic Wave) Flowmeter

### **KEY FEATURES:**

100% Non-invasive/hygienic/zero pressure drop

Single unit measures & LED Display of 5 key process parameters:

- Flow & Velocity
- Acoustic Wave Transmission %
- Density Factor
- Temperature
- Totalization

Compact small size

Without any parts in the measuring tube – Just A TUBE

Installation in any orientation: Vertical, horizontal or other

Light weight; 1-person installation

Visual ISO Ring LED indicator

CIP/SIP capable

Measurements independent of media conductivity

Communications & analog outputs (Ethernet IP, PROFINET, MODBUS TCP and More)

### **Examples of challenging sensing applications:**

- Beer – WART transfer – TRUB/Beer interphase
- NON-Conductive liquid applications – WFI RO & DI waters, OIL and more
- Phase Change - Instantaneous changes in media composition/concentration

### **Authorized Burkert Distributor:**

**EAGLE**  
**Sensors & Controls**
