## ZBAG999

Part Number

### Technical Data

#### Mechanical Data

Housing Material	ABS, PC, PVAL, TAC
Scope of delivery	8 × ZBAG001 - 004 4 × ZBAG005 - 006; ZBAG105

- **Costs reduced by the use of smaller luminaires**
- **Create patented curve effect to reduce LED hot spots**
- **Improved scanning rate**
- **Increased homogeneity**
- **Quick and easy beam-angle change, ideal for project changes and feasibility studies**

The ZBAG999 angle changer combo kit is the perfect tool for a feasibility study using the LBA bar lights. It comes with all ZBAG00x angle changer options for modifying the illumination angle. The ZBAG999 also contains a blackout tool to reduce the size of the bar in testing to help you find the perfect bar light length for your application. Additionally, you will find a polarizer and a transparent version (no change of the beam angle) – this will assist you with creating the curve effect. This full testing kit comes in a compact demo case which you can empty and refill as you need for applications and customer demonstrations on site.
