

# 5 Pairs of Screening Grids for ZLSS002

## ZLSE005

Part Number

### Technical Data

#### Mechanical Data

Material	Plastic
Coated Optics	yes
Packaging unit	5 pairs

- Antireflection coated in broad ranges with wavelengths from 400 to 700 nm
- Hardened surface
- Suitable for sensors with red or blue light
- Suitable for the respective protective disc retainer

The use of protective discs results in an offset in the Z direction of the sensor's measuring range. The amount of offset depends on the sensor model. Furthermore, linearity error is influenced by up to 0.1%.

1 = Emitter and receiver side identical  
All dimensions in mm (1 mm = 0.03937 Inch)
